Sikasso

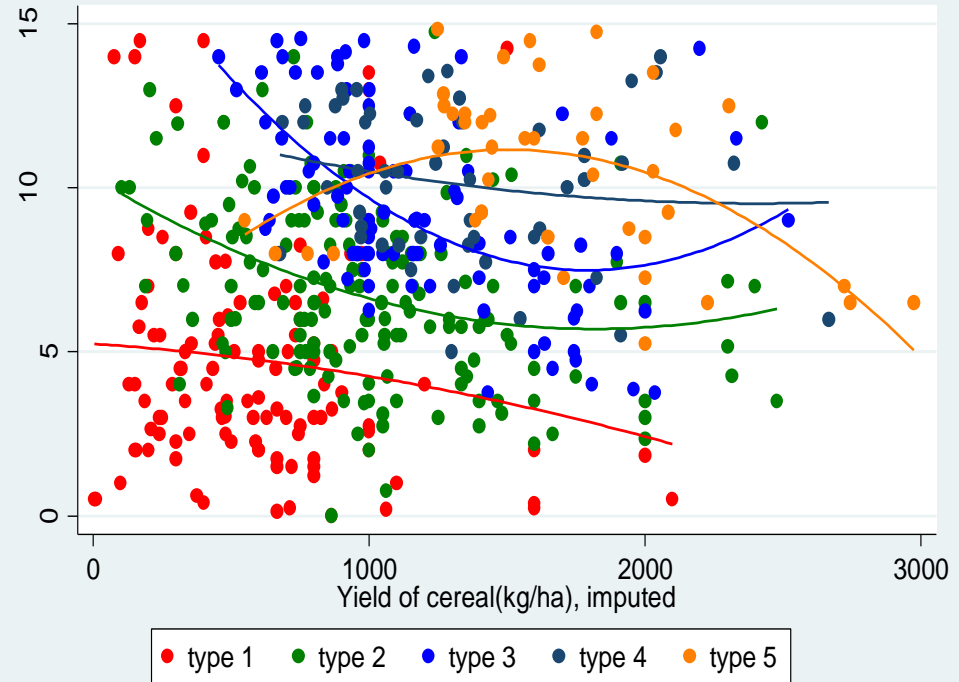

Non-agricultural wealth

Mali/2

Farmer typologies
Sikasso

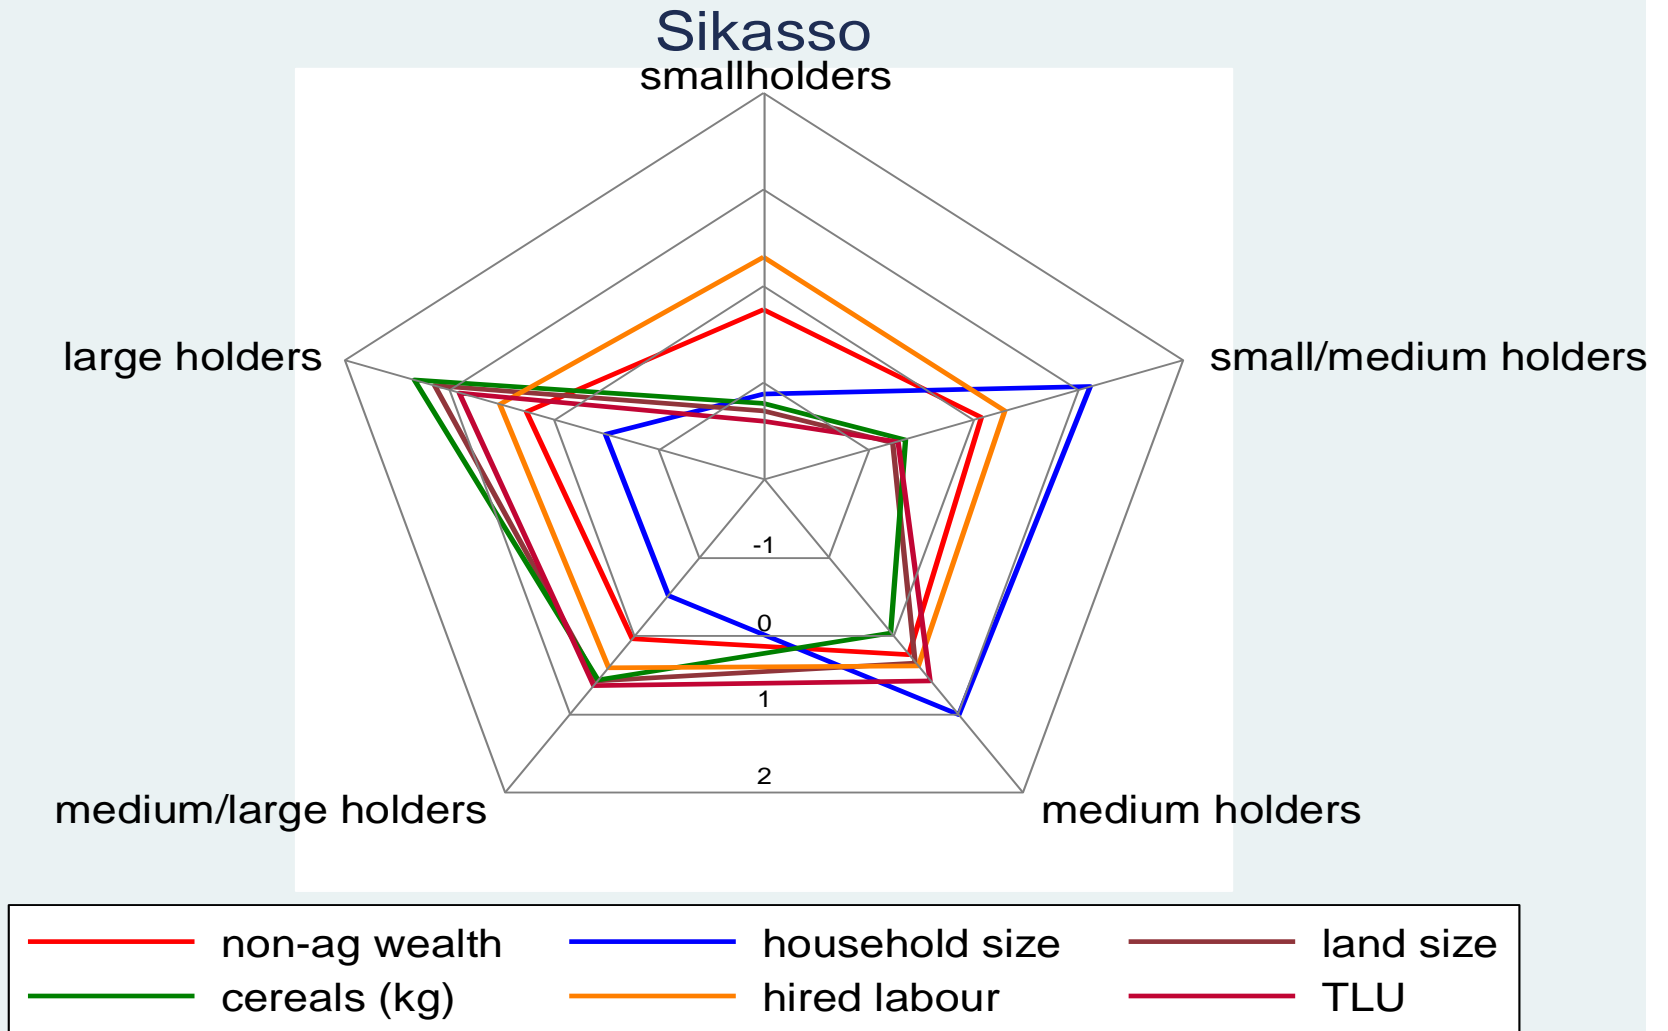

Farmer typologies
Sikasso

Land size, cereal production, maize yield

Mali /3

Land holding

Summary and road ahead

- Objective of the typologies: good fit between targeted farmers and appropriate interventions
- Trade-off between intra-cluster and inter-cluster homogeneity, not too few variables, not too many
- The present typologies are based on 6 variables:
 - Non-ag wealth, hh size, land size, cereals production, % prevalence of hired labor, total TLU
- Typologies should be tailored to the type of interventions, local conditions and specific needs...
- ...let's sit down and agree on the dimensions to be considered in each mega-site/country/district/woreda
